

## Star Ornament

Download my star ornament template (pdf):

[Download template for Christmas star decorations](#) (click here to go to site)

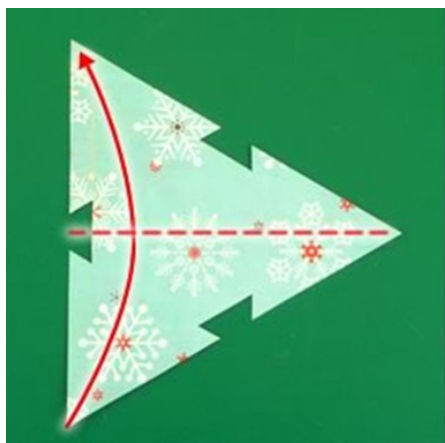

The template download includes three sizes: large (6 inches), medium (5 inches), and small (3.5 inches).

Print out the template for the size of star that you would like to make, and cut out along the solid line.

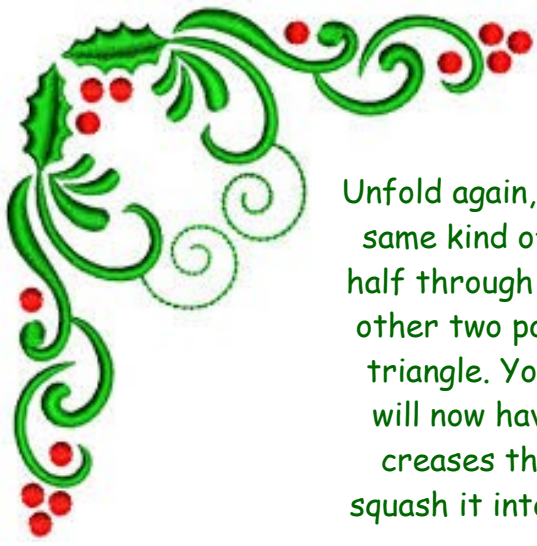

Trace around the template onto your scrapbooking paper.

Cut out two copies of the pattern. Here I'm using a double-sided red and blue Christmas-themed scrapbooking paper.

Take one of the triangles and fold it in half

Unfold again, then do the same kind of folding in half through each of the other two points of the triangle. Your triangle will now have a set of creases that let you squash it into this shape

Repeat for the other triangle. Your triangles should look something like this

Slot the two triangles together.

Here's the finished Christmas star decoration.
